

ALGE TIMING TDC 8000

Basic Timing using Radios (TDX)

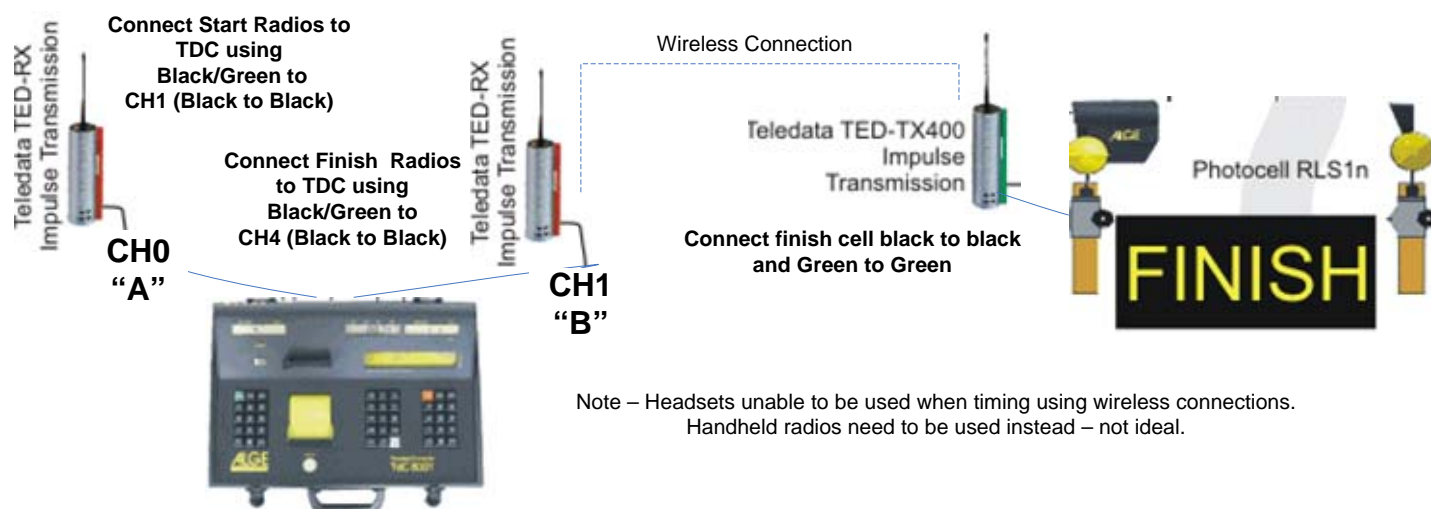

Connect start gate black to black
and Green to Green

**Connections are
always Black to Black.**

Wireless Connection

**IMPORTANT – ENSURE THAT TED's ARE
MATCHED PAIR, (COLOUR CODED)**

Note – Headsets unable to be used when timing using wireless connections.
Handheld radios need to be used instead – not ideal.

A combination of cables and radios may be used as required.

Radio Start/Finish

- START Connect start gate to TDX with Banana plug. (Green/Black)
Connect TRX to TDC with black lead (004) to socket “A” or 2 core cable to CH0
- FINISH Connect Finish cell to TDX with 2 core cable (Black/Green)
Connect TRX to TDC with Banana plug to CH1 (Black/Green) or black lead (004)
to socket “B”

NB: Banana Plugs are preferable for start and finish rather than Black Din Leads.
